QGIS Application - Bug report #14388
2.8.7 requires libjs-leaflet

2016-02-29 01:19 AM - Ian Goddard

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Unknown			
Affected QGIS version:	2.8.7	**Regression?:**	No	
Operating System:	Debian	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	22369	

Description

Attempting to update 2.8.6->2.8.7 on Debian Wheezy fails because libjs-leaflet is required & is not in repository. Workround is to download from Debian Sid & install manually. Suggest adding it to http://qgis.org/debian-ltr wheezy main

NOTE: I have had to set the affected version to 2.8.5 because this is the latest version on the drop-down list. The list is now 2(TWO) versions out of date!

History

#1 - 2016-02-29 02:13 AM - Jürgen Fischer

- Affected QGIS version changed from 2.8.5 to 2.8.7

- Resolution set to fixed/implemented

- Status changed from Open to Closed

libjs-leaflet added to debian-ltr
