## History

### #1 - 2006-11-10 06:36 AM - lami-faunalia-it -

This is particularly annoying especially because some errors lock the shell, and to proceed one is forced to open a new one (leaving the previous one open).

### #2 - 2007-07-21 09:01 PM - Tim Sutton

Changed to minor under the following scheme:
 blocker - bugs that should block the release. Since we are going to release pretty much 'come what may' I would like no bugs

allocated to this category without consultation with me and / or PSC

critical - bugs that cause the application to crash or corrupt data

major - application features that do not function at all

minor - features that function but imerfectly e.g. labels placing incorrectly

trivial - gui useability issues or small issues with the documentation, install notes etc.
