Affected QGIS version:	2.14.0	**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22383

Description

I'm getting random results when I try to use labels with MSSQL layers. Sometimes It appears, sometimes It doesn't.

It works fine with number fields (int, real, float, seq), but with strings (varchar, nvarchar) or dates (date, datetime) It is totally random when It will appears or not. I tried to pin It down what is causing this but I couldn't find the cause.

Using QGIS 2.14.0 on a Windows 7 64 bits. Database MS SQL Server 2008 R2.
