Easy fix?:	No	**Copied to github as #:** 22391	

Description

When manually adding items to a legend in the print composer, you need to add one by one the layers you want, opening the dialog, selecting the layer, press the Add button and then again opening the dialog....

It should be more easier to process, by allowing:

- double-click on a layer name to get it added
- and select multiple items to add
