On Mac OS 10.10.5 (Yosemite), [Kynghaos](#) QGIS 2.14.0-1, and I'm also not able to locate MSYS. I believe it should be in /Applications/QGIS.app/Contents/. I am able to locate Grass: /Applications/QGIS.app/Contents/MacOS/grass/.

Apparently msys is no longer required, so it should not be requested.

Fixed for GRASS 7 in master. As GRASS 6 still installed with MSYS I did not change it for GRASS 6.

If this will work fine, I'll backport it also to 2.14
