

QGIS Application - Bug report #14464

Full zoom fails if a filter query is defined on shp vector layer

2016-03-12 02:24 AM - Christophe Damour

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Canvas	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 22442
Description		
<p>If a filter query is defined on a shp vector layer, full zoom fails and every zooming function stop working until filter query is removed. Tested with several shp layers, works fine on 2.8.7, works fine with spatialite layers.</p>

- File COMMUNES.zip added

A shp layer on which the bug can be reproduced is attached to this message.

#2 - 2016-03-12 02:50 AM - Anita Graser

Tested with the query

"NOM" IN ('FUSSY','ANNOIX','LE SUBDRAY')

and cannot reproduce the issue on Win8 with 2.14 or master. Can you add more details?

#3 - 2016-03-12 03:04 AM - Christophe Damour

Well, I tested again with your query and I have the same problem.

It occurs when I click "full zoom" button or when I select "zoom to layer" in the contextual menu.

Other navigation functions don't seem to be affected.

#4 - 2016-03-12 03:11 AM - Anita Graser

Are you using a provider filter (Layer properties | General | Provider feature filter) or something different? Any output in the Log Message Panel (speech bubble button in the bottom-right corner of the main window)?

#5 - 2016-03-12 04:14 AM - Christophe Damour

I am indeed using the provider filter, and there is no error in the Log Message Panel.

I tried to remove every plugins, but still got the same problem.

- *Resolution set to fixed/implemented*

You're right, confirmed in 2.14.0 release, but seems fixed in 2.14 dev and master.

#7 - 2016-03-12 05:43 AM - Christophe Damour

Great ! Thank you very much for your help.
