

QGIS Application - Feature request #1448

overview map won't show layer when Use scale dependent rendering is on in layer properties

2008-12-07 06:47 PM - Steven Mizuno

Status:	Closed	Resolution: fixed Copied to github as #: 11508
Priority:	Low	
Assignee:	nobody -	
Category:	Map Canvas	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>The scale settings don't matter - it is that scale dependent rendering is enabled and that the overview map has no scale (some default, actually).</p> <p>The overview may show the layer if it was displayed before the scale dependent rendering was enabled, but will disappear when the overview is redrawn as on a layer visibility change.</p> <p>The patch provided adds a test for mOverview in <code>[[QgsMapRenderer]]::render()</code> so the layer will be rendered if it has been added to the overview map.</p>
