

QGIS Application - Bug report #14483

Processing documentation for QGIS 2.14 is outdated/missing

2016-03-14 03:13 AM - Maximilian Krumbach

Status:	Rejected	
Priority:	Low	
Assignee:		
Category:	Documentation and Help	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 22459
Description		
The processing toolbox's help points to the online 2.8 documentation, which is mostly empty, and unhelpful in finding out what a parameter does. (as in http://docs.qgis.org/2.8/en/docs/user_manual/processing_algs/qgis/vector_overlay_tools.html). Better documentation can be found when replacing 2.8 with /testing/, so the docs are there, but well hidden. Will there be a documentation update for the current LTR?		

History

#1 - 2016-03-14 04:55 AM - Alexander Bruy

- Resolution set to invalid
- Status changed from Open to Rejected

Documentation now updated. It will be available when it's done.
