

QGIS Application - Bug report #14507

Copy & Paste object results in empty geometry and coordinates 0.0

2016-03-16 03:28 AM - Holger Sauter

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Digitising	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 22480
Description		
<p>Problem description: When copying a feature in a polygon layer (shapefile) and paste it in order to receive a duplicate that can be moved to another location on the map the object is not inserted on top or near the original object. Instead i get a new line in the attribute table with an obviously empty geometry. When selecting the corresponding line in the attribute table and zooming to selected feature the map view moves to 0/0 coordinates without showing a geometry.</p> <p>When i try this in a new qgis projectfile copy and paste works normal. Any suggestions ?</p>		

History

#1 - 2016-04-09 10:18 AM - Giovanni Manghi

- Target version deleted (Version 2.14)
- Status changed from Open to Feedback

Sorry is not clear to me when this issue surfaces and when not. Please leave further feedback.

#2 - 2016-05-23 07:51 AM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed

closing for lack of feedback, reopen if necessary (with more details and sample data).
