

QGIS Application - Bug report #14519
[Ubuntu 16.04] Apt Repository problem

2016-03-17 01:36 AM - Tomasz Nycz

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Build/Install	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:	Ubuntu	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 22492

Description

Trying to install QGIS from official repo with clean/fresh installation of Xubuntu Xenial, getting apt error, suggesting network (proxy) problem:

W: Failed to fetch http://qgis.com/debian/dists/xenial/InRelease Clearsigned file isn't valid, got 'NOSPLIT' (does the network require authentication?)

E: Nie udało się pobrać niektórych plików indeksu, zostały one zignorowane lub użyto ich starszej wersji.

With terminal wget I'm getting wrong (frameset) output of InRelease file

```
wget -O - http://qgis.com/debian/dists/xenial/InRelease
--2016-03-17 09:28:50-- http://qgis.com/debian/dists/xenial/InRelease
Translacja qgis.com (qgis.com)... 91.142.249.5
Łączenie się z qgis.com (qgis.com)[91.142.249.5]:80... połączono.
Żądanie HTTP wysłano, oczekiwanie na odpowiedź... 200 OK
Długość: 699 [text/html]
Zapis do: `STDOUT'
```

```
-                                0%[                                     ] 0

=====>] 699 --KB/s in 0s

2016-03-17 09:28:50 (37,4 MB/s) - zapisano na standardowe wyjście [699/699]

But on web browser (firefox) I'm getting correct output:

-----BEGIN PGP SIGNED MESSAGE-----

Hash: SHA1

Origin: QGIS project

Label: QGIS repository

Suite: xenial

Codename: xenial

Date: Sun, 28 Feb 2016 23:15:44 UTC

Architectures: amd64 i386

Components: main

Description: QGIS project ubuntu repository

MD5Sum:

.....

Tried with another ISP (broadband, mobile), same result. Tried on another (Debian based) computer in different localisation, same result.
