Affected QGIS version:	2.14.0		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	
Crashes QGIS or corrupts data:			**Copied to github as #:**	22509

Description

QtGui.QMessageBox.information(None, "Current field's value", "[% $currentfield %]")

should be:

QtGui.QMessageBox.information(None, "Current field's value", "[% $currfield %]")

(i.e. $currfield instead of $currentfield).

Revision 3d494ac9 - 2016-05-28 04:45 PM - Nyall Dawson

Fix feature's value action not working (fix #14536)

Replace broken/missing $currfield with new @current_field
expression variable. Update other default actions to use
expression variables instead of deprecated special columns.

Try a right click on some cell in attribute table or on some value in identify results. The expression was renamed from previously "%%" - this is still in the
user manual.
