

QGIS Application - Bug report #14548

CRS of new spatial bookmarks does't match CRS of current project

2016-03-23 12:11 AM - R. R.

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: duplicate
Crashes QGIS or corrupts data:		Copied to github as #: 22521
Description		
Subject says it all, I suppose it's a bug.		

History

#1 - 2016-03-23 08:17 AM - Maximilian Krumbach

The code at [qgsbookmarks.cpp:156](#) currently uses srsid(), which is the (correct) internal ID used by QGIS, but meaningless to the user. Expected behavior is the display of a EPSG code. Thus, changing srsid() to authid() would be better.

#2 - 2016-03-23 10:26 AM - Maximilian Krumbach

As usual, it's not as simple as changing just the value, several calculations depend on srid (all in the same file). I'd suggest adding an extra column, "authid", which will contain the EPSG code.
