

QGIS Application - Bug report #14594

Symbology: Maker Line errors when pen width less 0.265 mm

2016-03-31 02:18 AM - Andrea Lai

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 22562
Description		
<p>I have created a github repository at https://github.com/laingit/qgis-alai-bug with very simple case to reproduce the error; there is also a readme with images showing the error.</p> <p>I think the problem is related to: mm to pixel conversion (0.264583333).</p> <p>The triangle should be in the middle of the dashed line.</p> <p>When pen width is 0.3 mm (OK).</p> <p>When pen width is less than 0.265 mm (es. 0.2 mm; create problems).</p>
