

QGIS Application - Bug report #14606

Overlay tools and join Attributes from the processing are work correctly

2016-04-02 02:30 PM - Claas Leiner

Status:	Rejected	
Priority:	High	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.14.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: duplicate
Crashes QGIS or corrupts data:	No	Copied to github as #: 22572
Description Unfortunately, some tools from the toolbox of QGIS 2.14 not work correctly. Join Attributes tables not working (Bug report #14428) and overlay tools (#14504) produce incomplete results. When the Python Files (.installpath/python/plugins/processing/algs/qgis) JoinAttributes.py Intersection.py Clip.py Difference.py are replaced by the files from the previous version Processing (2.12.2) everything works. (Download: https://plugins.qgis.org/plugins/processing/version/2.12.2/) It would make sense to integrate this version 2.12.2 of the relevant tools in QGIS 2.14 until these bugs are fixed. Claas
