QGIS Application - Bug report #14620
Vector buffer and File creation error

2016-04-06 11:02 AM - Ben Cohen

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.14.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:		**Copied to github as #:**	22586	

Description

When I attempt to create a vector buffer using the Geoprocessing tools, I get an error stating "No output created. File creation error: creation of layer failed (OGR error:Failed to open Shapefile 'c:...."

I have write access to the directory. Running v2.14.0 Essen
Windows 10

Thanks!

- Status changed from Open to Feedback

Which plugin do you use: fTools or processing? Does it works in Processing, in fTools? Do you have enough space on disk? Does your file path contains non-ASCII characters? Are there any messages in QGIS message log? Does it works with other files?
