

QGIS Application - Bug report #14628

Very slow GetCapabilities with PostGIS layers

2016-04-07 07:50 AM - Nicolas Boisteault

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	QGIS Server	
Affected QGIS version:	2.8.7	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 22593
Description		
<p>Affected version QGIS Server 2.8.8 (I can only choose 2.8.7 in list above)</p> <p>I have a QGIS project with 30 PostGIS layers. When I make a GetCapabilities request on this project via QGIS Server it takes more 4 minutes to load.</p> <p>I think QGIS Server is doing a lot of request to PostGIS database. Are all requests necessary to build the response?</p> <p>If we can't avoid this slowness it would be handy to be able to activate cache for GetCapabilities response when project is finished.</p>		

History

#1 - 2016-04-09 07:33 AM - Giovanni Manghi

- Status changed from Open to Feedback

is still an issue on 2.14 or master?

#2 - 2016-05-23 10:46 AM - Giovanni Manghi

- Resolution set to not reproducible

- Status changed from Feedback to Closed

I tested with 55 postgis layers and the capabilities were produced in a few seconds (qgis server 2.14.3).

Please reopen if necessary.
