Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	22625

Description

Just noticed that effects are not working onto ellipse layers. The setup actually works, but once you apply it and close the property window, a/ the effects aren't drawn, b/ the settings are lost when you re-open the property window.

Steps to reproduce

1. Add a point dataset onto a new project
2. Open the layer property window, set the symbology layer to ellipse
3. Enable [x] draw effects, and add a drop shadow effect
4. Apply the settings and leave the property window, notice the effect isn't drawn
5. Re-open the property window, notice the effects settings are gone
