QGIS Application - Bug report #14666
delimitedtext provider "fills" missing coordinates

2016-04-12 06:47 AM - Kai Borgolte

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider/Delimited Text			
Affected QGIS version:	2.14.1		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	
Crashes QGIS or corrupts data:			**Copied to github as #:**	22630

Description

When reading a text file with coordinates, QGIS doesn't complain about missing values in X/Y fields. Instead the values from the previous line are used.

Doing the same in 2.8.2 Wien I get the message "Errors in file C:/Daten/Qgis/xytab.txt 2 records discarded due to missing geometry definitions"

Associated revisions

Revision 02e0e3f9 - 2016-04-13 07:42 AM - Nyall Dawson

Fix other feature's geometries are shown instead of null geometry

in delimited text provider (fix #14666)

Add tests, also fix virtual layer, mssql and db2 providers which

suffered the same bug
