

QGIS Application - Bug report #14698

No labels shown when font Size is set to Map unit for labels

2016-04-18 03:57 AM - Burghardt Scholle

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Labelling	
Affected QGIS version:	2.14.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 22662
Description		
Hi,		
if I select map units under "layer properties -> labels -> Text style", my settings for size range are not applied. If I click "ok" and open the dialog again, the entries have been deleted.		
System: Windows 7 64bit, Xubuntu 14.04, QGIS 2.14.1		
Regards		
Burghardt

It works fine for me. Do you have an example file?

- *File label_test.zip added*

Hi Saber,

please excuse my late reply - I was on leave.

Yes of course I have an example. In the uploaded zip-file you'll find a *.qgs and a simple shp-file. Even with these simple data the use of size range doesn't work for me.

Perhaps I should point out that I work in a German system environment.

- *Subject changed from Settings for text style "size range" in layer properties labels are not applied to No labels shown when font Size is set to Map unit for labels*

#4 - 2016-04-27 01:56 AM - Saber Razmjooei

I can see it in commit:d9ee875 but not in the latest master commit:e9bc8ae. I guess it's been fixed but will be great to have it backported for 2.14.2 as it is an annoying bug.

#6 - 2016-04-27 04:55 AM - Burghardt Scholle

Hi Saber,

I can confirm your experience. In the latest version (for me QGIS code revision "77d95b0") the size range works perfectly.

Thanks for the review.
