<b>Description</b>		
<p>It seems that the Grass plugin requires the presence of Q3* classes.</p> <p>I am not sure the backwards compatibility is still present in Qt 4.5; at any rate, it is going to be discontinued somehow, so it would be nice to enhance the Grass plugin to be QT4 native.</p> <p>Vincent</p>		

#### History

##### #1 - 2009-04-02 11:47 PM - Paolo Cavallini

The shell is now barely usable (see also several shell related bugs, probably related). Raising the priority.
