

QGIS Application - Bug report #14740

DB Manager: Previews do not work and python error

2016-04-28 12:35 AM - Giovanni Manghi

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Salvatore Larosa	
Category:	DB Manager	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 14.04 LTS	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 22698
Description		
More issue in DB manager on master (testing on linux, installed from the nightly repo on ubuntu). The preview of tables and geometries does not seems to work (it shows always the preview of the same layer), and at some point it starts to throw a python error TypeError: pyqtSignal must be bound to a QObject, not 'PGVectorTable' Traceback (most recent call last): File "/usr/share/qgis/python/plugins/db_manager/db_manager.py", line 116, in tabChanged self.refreshTabs() File "/usr/share/qgis/python/plugins/db_manager/db_manager.py", line 142, in refreshTabs self.preview.loadPreview(item) File "/usr/share/qgis/python/plugins/db_manager/layer_preview.py", line 62, in loadPreview self._clear() File "/usr/share/qgis/python/plugins/db_manager/layer_preview.py", line 83, in _clear self.item.aboutToChange.disconnect(self.setDirty) TypeError: pyqtSignal must be bound to a QObject, not 'PGVectorTable'
