

QGIS Application - Feature request #1475
Crash on opening project after moving GRASS-GISDBASE

2009-01-05 10:44 AM - grasslandtom -

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GRASS	
Pull Request or Patch supplied:		Resolution: duplicate
Easy fix?:	No	Copied to github as #: 11535
Description		
<p>Dear QGIS developers,</p> <p>When opening a QGIS project which contains GRASS layers which have been moved, QGIS gives an error message and exits after clicking OK.</p> <p>To reproduce do the following:</p> <p>_add some GRASS layers to a project</p> <p>_save and close project</p> <p>_move GISDBASE-folder to anywhere</p> <p>_reopen project in QGIS</p> <p>As a workaround the <datasource> fields in the project file can be adapted with a text editor. A file browser-like dialogue to let the user indicate the new path to GRASS-GISDBASE would be very helpful in such a case.</p> <p>Thank you very much!</p> <p>Tom</p>
