<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 22759
<b>Description</b>		
<p>After installing QGIS Essen 2.14.2 with the standalone installer and executing QGIS, I found this message in the "Processing" tab of the "Log Messages Panel":</p> <p>"Problem with OTB installation: OTB was not found or is not correctly installed"</p> <p>If I open the "Processing options" I can see that all the paths for Orfeo Toolbox are empty.</p> <p>In the official documentation of QGIS 2.8, it says: "Make sure you install QGIS in your system using the standalone installer. That will automatically install SAGA, GRASS and OTB in your system and configure them so they can be run from QGIS"</p>		

#### History

- Status changed from Open to Feedback

Can you check if you have OTB installed?

##### #2 - 2016-05-11 05:46 AM - Carlos Hernando

- File *otb\_processing\_folder\_.PNG* added

I did not install OTB with OSGeo4W, as according to the documentation QGIS standalone installation should take care of it.

Checking for OTB folders within the Essen QGIS folder I only find the one of the image attached (they seems only python bindings, not the OTB applications).

Should I check somewhere else?

- Assignee deleted (Victor Olaya)

otb-bin was only included in the x86 standalone installer. You can add it with setup on 64bit.

##### #5 - 2016-05-17 12:08 AM - Carlos Hernando

I assume that you mean with the OSGeo4W installer setup. don't you?

**#6 - 2016-05-18 12:45 AM - Carlos Hernando**  
*- Status changed from Feedback to Closed*

I have installed otb-bin with OSGeo4W installer and set the corresponding paths in the QGIS Processing Options:  
OTB applications folder: C:\\OSGeo4W64\\apps\\orfeotoolbox\\applications  
OTB command line tools folder: C:\\OSGeo4W64\\bin

Then, OTB is correctly installed in QGIS and I can use the OTB applications from the Processing Toolbox.

Thank you for your help. I close the issue, as it is solved.
