

QGIS Application - Bug report #14873

attribute table sorting fails on column named "YEAR"

2016-05-23 07:22 PM - Mathieu Pellerin - nIRV

Status:	Closed	
Priority:	Severe/Regression	
Assignee:		
Category:	Attribute table	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 22826
Description The attribute table sorting fails when clicking on a column named "YEAR". The same dataset with a renamed column, for e.g. "NOYEAR", will successfully sort the table. Steps to reproduce 1. Create a new project, add the following dataset (http://www.licadho-cambodia.org/land_concessions/data/licadho-land-concessions-2015.zip) 2. Open the attribute table 3. To test that sorting is working, click on the NAME column 4. Now click on the YEAR column, and notice the absence of sorting :)
