

QGIS Application - Feature request #14877

Add opacity slider for colour chooser in 2.5D renderer

2016-05-24 06:27 AM - Nikolay Lebedev

Status:	Closed	Resolution: Copied to github as #: 22830
Priority:	Normal	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>For now roof, wall and shadow colors for 2.5D renderer can't be made transparent. I thought a standard color chooser is used for colors there, but it's missing opacity slider. That should be quite handy when rendering buildings.</p>

Fixed in changeset commit:"7af95b10a0e3e4946940dfb0cb85486ff992e608".

#2 - 2016-05-25 05:04 AM - Nikolay Lebedev

Checked that transparency commit. It mostly works, but when `Shade walls based on aspect` checkbox is turned on, wall opacity can't be changed. I guess wall color get's calculated in that case, and opacity value doesn't get applied to the calculated colour.
