

## QGIS Application - Bug report #14879

### Error with symbol layer properties - This layer doesn't have any editable properties

2016-05-24 07:03 AM - Arthur Vignacq

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	GUI	
<b>Affected QGIS version:</b>	2.14.3	<b>Regression?:</b> No
<b>Operating System:</b>	OsX	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 22832
<b>Description</b>		
<p>When accessing the style tab of a layer properties, instead of options like colours, fill etc, I see the text "This layer doesn't have any editable properties" which stops me from accessing the full symbology settings.</p> <p>This is the same or similar issue as noted here with 2.10.1: <a href="http://gis.stackexchange.com/questions/157471/qgis-just-installed-on-mac-osx-vector-layer-styles-do-not-work-properly">http://gis.stackexchange.com/questions/157471/qgis-just-installed-on-mac-osx-vector-layer-styles-do-not-work-properly</a></p> <p>I just updated my QGIS 2.8 to 2.14.3 and me and a colleague are both affected by this bug.</p>		

#### History

##### #1 - 2017-05-01 01:05 AM - Giovanni Manghi

- Easy fix? set to No
- Regression? set to No

##### #2 - 2019-01-22 04:44 AM - Nyal Dawson

- Resolution set to fixed/implemented
- Status changed from Open to Closed
- Description updated

Not an issue in 3.x
