

QGIS Application - Bug report #14928

WMS request without BBOX

2016-05-30 11:54 PM - Daniel Debski

Status:	Closed	
Priority:	Normal	
Assignee:	Even Rouault	
Category:	Unknown	
Affected QGIS version:	2.8.5	Regression?: No
Operating System:	QGIS Desktop	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 22879
Description		
<p>All versions QGIS above 1.8.0 send WMS request to server without BBOX params. This situation is when I add WMS layer with coordination system the same like project coordination system. In my case it was project coordination system EPSG:2176. When I add WMS layer with different coordination system (for example EPSG:2180) I can show this but unsatisfactory quality (transformation). After checking it turned out, that WMS requests are incomplete. Attachments include requesting logs.</p>
