| **Pull Request or Patch supplied:** | | **Resolution:** | |
| **Crashes QGIS or corrupts data:** | | **Copied to github as #:** | 22949 |

| **Description** |
|---|
| In arrow symbol layers: Changing the arrow head width setting modifies the drawn head height and other way around. |

## Associated revisions

**Revision 6568da6c - 2016-06-14 04:54 AM - Nyall Dawson**

Rename arrow symbol head width/height to length/thickness

Width/height naming is dependant on line direction, so for

clarity rename them to something which doesn't depend

on direction (fix #15002)
