

QGIS Application - Bug report #15008

QGIS Crashes when right clicking on a table added from PostGIS

2016-06-12 07:20 AM - Randal Hale

| | | |
|---|-----------------------|--------------------------------------|
| Status: | Closed | |
| Priority: | High | |
| Assignee: | Jürgen Fischer | |
| Category: | Data Provider/PostGIS | |
| Affected QGIS version: | master | Regression?: No |
| Operating System: | Ubuntu | Easy fix?: No |
| Pull Request or Patch applied: | No | Resolution: fixed/implemented |
| Crashes QGIS or corrupts data: | Yes | Copied to github as #: 22955 |
| Description | | |
| If you add a table from postgis then right click on the table - QGIS Crashes. I rebooted and renamed my .qgis2 directory but it didn't help. I do have write access to the table. | | |

Is this a non spatial table? If so, should have been fixed by commit:054604bc709129efbc05098f09cacd8f0204efe9

#2 - 2016-06-12 02:35 PM - Randal Hale

It is non spatial - I'll update qgis tonight and check it. Thanks.

#3 - 2016-06-13 07:15 PM - Nyal Dawson

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

Fixed by commit:054604bc709129efbc05098f09cacd8f0204efe9 - please reopen if it's still reproducible
