

QGIS Application - Feature request #15010

Customization: Highlight unchecked items from the tree in QGIS interface

2016-06-12 08:55 AM - Harrissou Santanna

Status:	Open	Resolution:  Copied to github as #: 22957
Priority:	Normal	
Assignee:		
Category:	Customisation Framework	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>When using the customization widget catcher on items in qgis interface, unchecked buttons are (kept) highlighted, which is very helpful to identify what are the buttons being "removed". It could be handy to also have widgets highlighted when they are unchecked from the widget tree in the customization dialog (and i think it will add more coherence and readability to the process).</p>
