Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:		**Copied to github as #:**	22961

Description

Since commit:ef51b70, canvas decoration elements can be hidden under docked panels opened during a QGIS session. It affects both QGIS' own canvas decorations, as well as plugins (such as TimeManager).

Steps to reproduce

1. Launch QGIS, make sure the style dock panel is docked, and close it
2. Add a layer to a new project
3. Add a scale bar decoration, position it to the bottom right of your canvas
4. Open the style dock, and note the scale bar gone hidden below the style dock
