<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 22965
<b>Description</b>  In qgis-dev 2.15.0-85 (OSGeo4W x86) we always get a QGIS minidump while closing a docked attribute window. The source of vector data does not matter in that case.  The current workaround is: working without docking the attribute window.
