

QGIS Application - Feature request #15021

Customization: the widget catcher should select menus, sub-menus and status bar widgets

2016-06-13 05:01 AM - Harrissou Santanna

Status:	Open	Resolution: Copied to github as #: 22968
Priority:	Normal	
Assignee:		
Category:	Customisation Framework	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
Currently, the widget catcher can't interact with menus or sub-menus. Might be nice to be able to pick them too.

- Subject changed from Customization: the widget catcher should select menus and sub-menus to Customization: the widget catcher should select menus, sub-menus and status bar widgets

The same with the status bar widgets.
