

QGIS Application - Bug report #15065

Failed detection of geometry type in some conditions

2016-06-18 09:35 AM - Even Rouault

Status:	Closed	
Priority:	Normal	
Assignee:	Even Rouault	
Category:	Data Provider/OGR	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed/implemented
Crashes QGIS or corrupts data:		Copied to github as #: 23008
Description		
<p>When a OGR layer is of geometry type "unknown", we use the geometry of the first feature to guess the geometry type. But if this feature has no geometry, then we assume that we have no geometry for the whole layer. This is a bit extreme. Let us allow to probe a few features before giving up.</p>

[OGR provider] Improve detection of layer geometry type

When a OGR layer is of geometry type "unknown", we use the geometry of the first feature to guess the geometry type. But if this feature has no geometry, then we assume that we have no geometry for the whole layer. This is a bit extreme. Let us allow to probe a few features before giving up.

Fixes #15065

History

#1 - 2016-06-18 09:37 AM - Even Rouault

- Status changed from Open to Closed

Fixed in changeset commit:"3b65568c7352e67db47b5a673be63988fbb8600e".

#2 - 2016-06-18 09:37 AM - Even Rouault

- Target version set to Version 2.16

- Status changed from Closed to In Progress

#3 - 2016-06-18 09:50 AM - Even Rouault

- Resolution set to fixed/implemented

- % Done changed from 0 to 100
