QGIS Application - Bug report #15070
GeoPackage connection missing in 'DB Manager'

2016-06-18 03:47 PM - R. R.

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	DB Manager			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	end of life	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23013	

Description

After creating a new GeoPackage layer the database connection in the 'DB Manager' is missing.

Could you please check whether this is still valid in QGIS 2.18?
Thanks.

- Status changed from Feedback to Open

Yes it is still true: QGIS is inconsistent compared to spatialite. When creating a new SL db this is registered as connection, and available in BD manager and trough the "add spatialite layer" button. There is no "add gpkg layer" button and when creating a new gpkg this is not registered as a connection (probably because that button is missing).

For this reason this do not seems a BD Manager issues (where you can manually register a new connection to an existing gpkg).

#3 - 2017-05-01 01:05 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

#4 - 2019-03-09 04:23 PM - Giovanni Manghi

- Resolution set to end of life

- Status changed from Open to Closed

End of life notice: QGIS 2.18 LTR
