QGIS Application - Bug report #15081
Impossible to clear geometry of feature from a shapefile

2016-06-19 08:22 AM - Harrissou Santanna

Status:	Closed			
Priority:	Normal			
Assignee:	Even Rouault			
Category:	Data Provider/OGR			
Affected QGIS version:	2.14.3	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:		**Copied to github as #:**	23023	

Description

Select all vertices of a (already saved) feature in a shapefile, click DEL to erase them.

They get wiped and message bar shows: "Geometry has been cleared. Use Add part tool to set geometry for this feature".

Click to save and your geometry reappears with this critical message from bar: "Layer XXXX: OGR error creating geometry for feature X: ".

At the same time, you can add geometryless feature from the attribute table dialog.

This looks no coherent.
