

## QGIS Application - Feature request #15084

### Show Z value in "Current map coordinate"

2016-06-20 01:58 AM - Francisco Raga

<b>Status:</b>	Open	<b>Resolution:</b> <b>Copied to github as #:</b> 23026
<b>Priority:</b>	Low	
<b>Assignee:</b>		
<b>Category:</b>	Rasters	
<b>Pull Request or Patch supplied:</b>	No	
<b>Easy fix?:</b>	No	
<b>Description</b>  Currently the "Current map coordinate" textbox only shows the X and Y values. If the user has loaded a layer with Z values or a MDT, when he passes the cursor over the pixels, it would be great if it shows the 3 values X,Y and Z. if there is no Z value,then show 0.		

#### History

##### #1 - 2017-05-01 12:46 AM - Giovanni Manghi

- Easy fix? set to No

##### #2 - 2017-05-06 10:58 PM - Regis Haubourg

- Priority changed from Normal to Low

- Category set to Rasters

- Description updated

Hi, there can be many DEM loaded and many Z informations at the same place. What you ask for would require a setting to choose which reference DEM to use. I think this is pretty close to what the "Value Tool" plugin does.

And this to me always raised the question/problem: there are a few 3rd party plugin that are SO fundamental (value tool, group stats and a few others) that is really surprising that the devs always overlooked their implementation into core qgis.
