Crashes QGIS or corrupts data:	No	Copied to github as #: 23048
Description		
<p>Create a rule-based rendering mode and set no symbol to one of the rules</p> <p>In the Layers panel, right-click on the "no-symbolized" rule and select "Edit Symbol"</p> <p>Nothing happens.</p> <p>I think it should pop-up a message that there's no symbol associated to the rule (or, more advanced, ask if you want to associate one symbol and then open the corresponding dialog)</p>
