<b>Pull Request or Patch supplied:</b>		<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b>	No	<b>Copied to github as #:</b> 23120
<b>Description</b> <p>QGIS currently does not support No/Unkwon CRS. This leads to lots of confusion for new users. In addition, CRS is not always applicable to layers loaded in QGIS. Here are a couple of use-cases:</p> <p><b>Attribute tables with no geometry</b></p> <p>When you load a CSV as an attribute table with no geometry, QGIS automatically applies the default CRS. This can trigger the OTF and results in some confusions.</p> <p><b>Unknown CRS</b></p> <p>Sometimes user simply wants to add a layer and doesn't want to have a CRS assigned to it. Examples of that can be found in MapInfo or CAD.</p>		

#### History

**#1 - 2017-05-01 12:46 AM - Giovanni Manghi**

- *Easy fix? set to No*

**#2 - 2017-05-06 10:49 PM - Regis Haubourg**

- *Category set to Projection Support*

- *Description updated*

I think it is done in master now, the unknown projection has been introduced by Nyal and OTF was removed.

**#3 - 2017-05-30 09:26 AM - Saber Razmjooei**

- *Resolution set to fixed/implemented*

- *Status changed from Open to Closed*
