Please remove your local processing install first.

#2 - 2016-07-25 04:12 AM - stefano campus

it's a brand new installation via osgeo4w with qgis 2.16 and qgis dev only.
all keys in the registry were deleted before instalation as the .qgis2 folder.

processing is not a plugin anymore, is it?
so which local installation do i have to dleete?

thank you

s.
