<b>Description</b>		
<p>When I open the "Points in Polygon" app within the Vector Analysis Tools, it does not list in the "Input point vector layer attributes to aggregate" a field that Table Manager tells me is an 'Integer64' field type. However, in another version of the same table, where that particular field is 'Integer' type (instead on Integer64), the field correctly shows up for selection within Points in Polygon. I think it must be a bug.</p> <p>Note: the afflicted version is 2.14.4 LTR (the dropdown list in the new issues reporting page has no 2.14.4 to select).</p>
