

QGIS Application - Bug report #15374

Metasearch error on Upgrade to 2.16.1

2016-08-02 06:08 PM - Randal Hale

Status:	Closed	
Priority:	Normal	
Assignee:	Tom Kralidis	
Category:	MetaSearch Catalogue Client	
Affected QGIS version:	2.16.0	Regression?: No
Operating System:	Linux	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 23304

Description

I just upgraded to qgis 2.16.1 on Ubuntu 16.04 and received the following error: Python error: Couldn't load plugin MetaSearch due to an error when calling its classFactory() method See message log (Python Error) for more details.

The error log has:

2016-08-02T20:59:24 1 Traceback (most recent call last):

```

ImportError: No module named requests
```

I'm using the following repos:

deb <http://qgis.org/ubuntuqgis> xenial main

deb <http://ppa.launchpad.net/ubuntuqgis/ubuntuqgis-unstable/ubuntu> xenial main

History

#1 - 2016-08-03 06:00 AM - Andre Joost

Same here on Linux Mint 18.

sudo pip install requests in a command window solved the problem for me.

So I guess it is a packaging problem.

#2 - 2016-08-03 10:23 AM - Tom Kralidis

- *Resolution set to fixed/implemented*
- *Status changed from Open to Closed*

Reported / fixed in #15368. Fixed packaging setup in master and will be backported accordingly.
