

QGIS Application - Bug report #15398

qgis crashed at star up with the message "minidump written to C:..."

2016-08-05 08:25 PM - Omar Ali Marquez

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Unknown	
Affected QGIS version:	2.14.3	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 23328
Description		
Hello... first my english is not so well I apologize for that... I was writing a python code on the field calculator of qgis 2.14.3, then when i run it qgis crashed and then it closed... now i tried to open qgis but it crashed at start up with the message "minidump written to C:\\Users\\OMARAL~1\\AppData\\Local\\Temp\\qgis-20160804-104449-4232-6512-cf2ebb8.dmp" i already try uninstalling the program and download the same version from the website but I still see the same message and not let me open the program The version of qgis is 2.14.3 for windows 10 64 bit		
Hola, estaba escribiendo un codigo python en la calculadora de campos de qgis 2.14.3, cuando intenté correrlo qgis se cerró, ahora intento abrir el programa y me da el siguiente mensaje "minivolcado escrito en C:\\Users\\OMARAL~1\\AppData\\Local\\Temp\\qgis-20160805-230810-3048-9964-cf2ebb8.dmp" Ya intenté desinstalar el programa, luego volver a descargar la misma versión qgis 2.14.3 y reinstalarla pero me sigue dando el mismo mensaje y no me deja abrir el programa

I solve the problem, for all the problems of minidump you only need to delete de .qgis2 folder, then restart the program and qgis will create a new .qgis2 folder for it self, and that is all

#2 - 2017-01-12 07:26 AM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Open to Closed
