QGIS Application - Feature request #15457
Multi-attribute search: keep chained filters for search with relation reference widgets

2016-08-18 02:04 AM - Andreas Neumann

Easy fix?:	No	**Copied to github as #:**	23383

Description

The relation reference widget has a "chained filter option" that allows to e.g. have a drill-down search in address, first filtering say by zip, then street, then house nubmers.

When entering the multi-attribute search mode, this "chained filter option" is not available anymore, even if it would be very useful, e.g. to search for all the addresses with the same zipcode or streetname.

See PDF attached.
