

QGIS Application - Bug report #15458

Attribute table: the dialog to manage visibility and order of attribute columns can get out-of-sync

2016-08-18 02:52 AM - Andreas Neumann

Status:	Closed	
Priority:	High	
Assignee:	Matthias Kuhn	
Category:	Attribute table	
Affected QGIS version:	2.16.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 23384
Description		
Apparently, the "Organize table columns" dialogue can easily get "out-of-sync" with the actual visibility of the table columns. Steps to reproduce: 1. set one column to hidden 2. close the attribute table 3. Open the attribute table 4. Open the "Organize table columns" dialogue by right-clicking on a column header 5. Set the column to visible 6. Close the "Organize table columns" dialogue 7. Open the "Organize table columns" dialogue --> the visibility checkbox is "out of sync". Shows the the column "Adresse Anlage" as hidden, while it is actually visible in the attribute column Maybe it matters: the first column is an "Action widget column". See attached screenshot
