

QGIS Application - Feature request #15513

Diagrams: no friendly interface to update an existing expression (too hard)

2016-09-01 09:09 AM - Harrissou Santanna

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Diagrams	
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Easy fix?:	No	Copied to github as #: 23437
Description In layers's properties > Diagrams you can set an expression to build your diagram Then if you want to rewrite this expression, double-clicking the expression simply offers you to write it within the text box, which is not easy nor friendly at all when you are using a complex expression. I think that double-clicking an expression or at least, select the expression and push the expression builder button should open the expression builder dialog (prefilled with the current expression, as done when a field is selected in the left column) for an easy typing		

History

#1 - 2016-09-01 09:18 AM - Harrissou Santanna

Note that simply change the expression in the textbox seems to not really change the expression given that hitting "Apply" does nothing (see #15514)

#2 - 2016-12-06 02:32 AM - Harrissou Santanna

- Resolution set to fixed/implemented

works in 2.18.1 (f4c99d9)

#3 - 2016-12-06 02:32 AM - Harrissou Santanna

- Status changed from Open to Closed
