QGIS Application - Bug report #15531
Attributes not being saved in KML

2016-09-05 10:38 AM - Stephane Goldstein

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Vectors			
Affected QGIS version:	2.18.0	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	23455	

Description

When saving to KML, attributes aren't being included in the output file. Even if choosing the fields to be mapped to "Name" and "Description"

History

#1 - 2016-10-06 08:17 AM - Even Rouault

When selecting KML, attributes are unselected by default. You should make sure to select (tick the checkbox) the attributes you want AND define them as aliases in NameField and DescriptionField options. When doing that, that works for me.
