

QGIS Application - Bug report #15563

QGIS do not preserve z coordinate when copy/paste multipart features in spatialite

2016-09-13 05:20 AM - Darek Bobak

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Unknown	
Affected QGIS version:	master_2	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 23486
Description When copying features between spatialite layers, QGIS does not preserve z coordinate if the source and destination layer is multipart. Also, identification tool does not show Z coordinate when identifying multipart features as well as function z in field calculator cannot calculate z dimension for multipart features. All of the above works well with single part layers. QGIS master, installed on Windows 10.
