

QGIS Application - Bug report #15567
"Merge Selected Features" Tool - wrong source attribut

2016-09-14 11:49 PM - Marcel Foelsch

Status:	Closed	
Priority:	High	
Assignee:	Victor Olaya	
Category:	Processing/SAGA	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 23490
Description		
The newest (nightly build) versions of QGIS do not work properly regarding the saga tool "merge vector layers". Normally you see source (names) of the merged layers as an attribut in the processed merged layer. What I get is not the name but a number as an source attribut.		

History

The merge algorithm uses the names of the layer files. Looks like the layers you are trying to merge are temporary, and that's why they have that name.
