QGIS Application - Bug report #15576 QGIS is lagging after a few saves in PostGIS layers

2016-09-17 08:41 PM - Luiz Andrade

Status:	Closed		
Priority:	High		
Assignee:	Jürgen Fischer		
Category:	Data Provider/PostGIS		
Affected QGIS version:2.14.5		Regression?:	No
Operating System:	Kubuntu	Easy fix?:	No
Pull Request or Patch supplied:		Resolution:	not reproducable
Crashes QGIS or corruptesdata:		Copied to github as #	: 23500
Description			
In Kubuntu 14.04 after a few editing rounds on PostGIS layers QGIS starts to lag until it becomes unresponsive. I need to kill the application and start over. All data is saved correctly. But, when checking my PostgresqI log I could get this: "could not receive data from client: Connection reset by peer" This means that the QGIS's connection is getting broke in same way.			
This happens when working with topology layers and SFS layers.

Hi Luiz, have you tried to deinstall all 3rd party plugins?

#2 - 2017-02-04 02:50 AM - Giovanni Manghi

- Priority changed from Normal to High

#3 - 2017-03-07 08:11 AM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Open to Closed

Closing for lack of feedback. Symptoms like this ones were reported several times, most of them the problem was a 3rd party plugin.
